

Find it Fast!:

How to find and use academic databases - Scopus

Eleni Borompoka

2019/20

Tools for finding academic information

Tools/resources depend on the type of information you're looking for:

- Books: Primo, e-book collections (Ebook Central, SpringerLink, ScienceDirect etc.), Google and Google Scholar
- Reports and commercial/trade information: Google Advanced Search
- Journal articles published outside the date range of the databases we subscribe to: Google Scholar
- **Journal articles** (research papers), reviews, conference papers, book chapters: databases

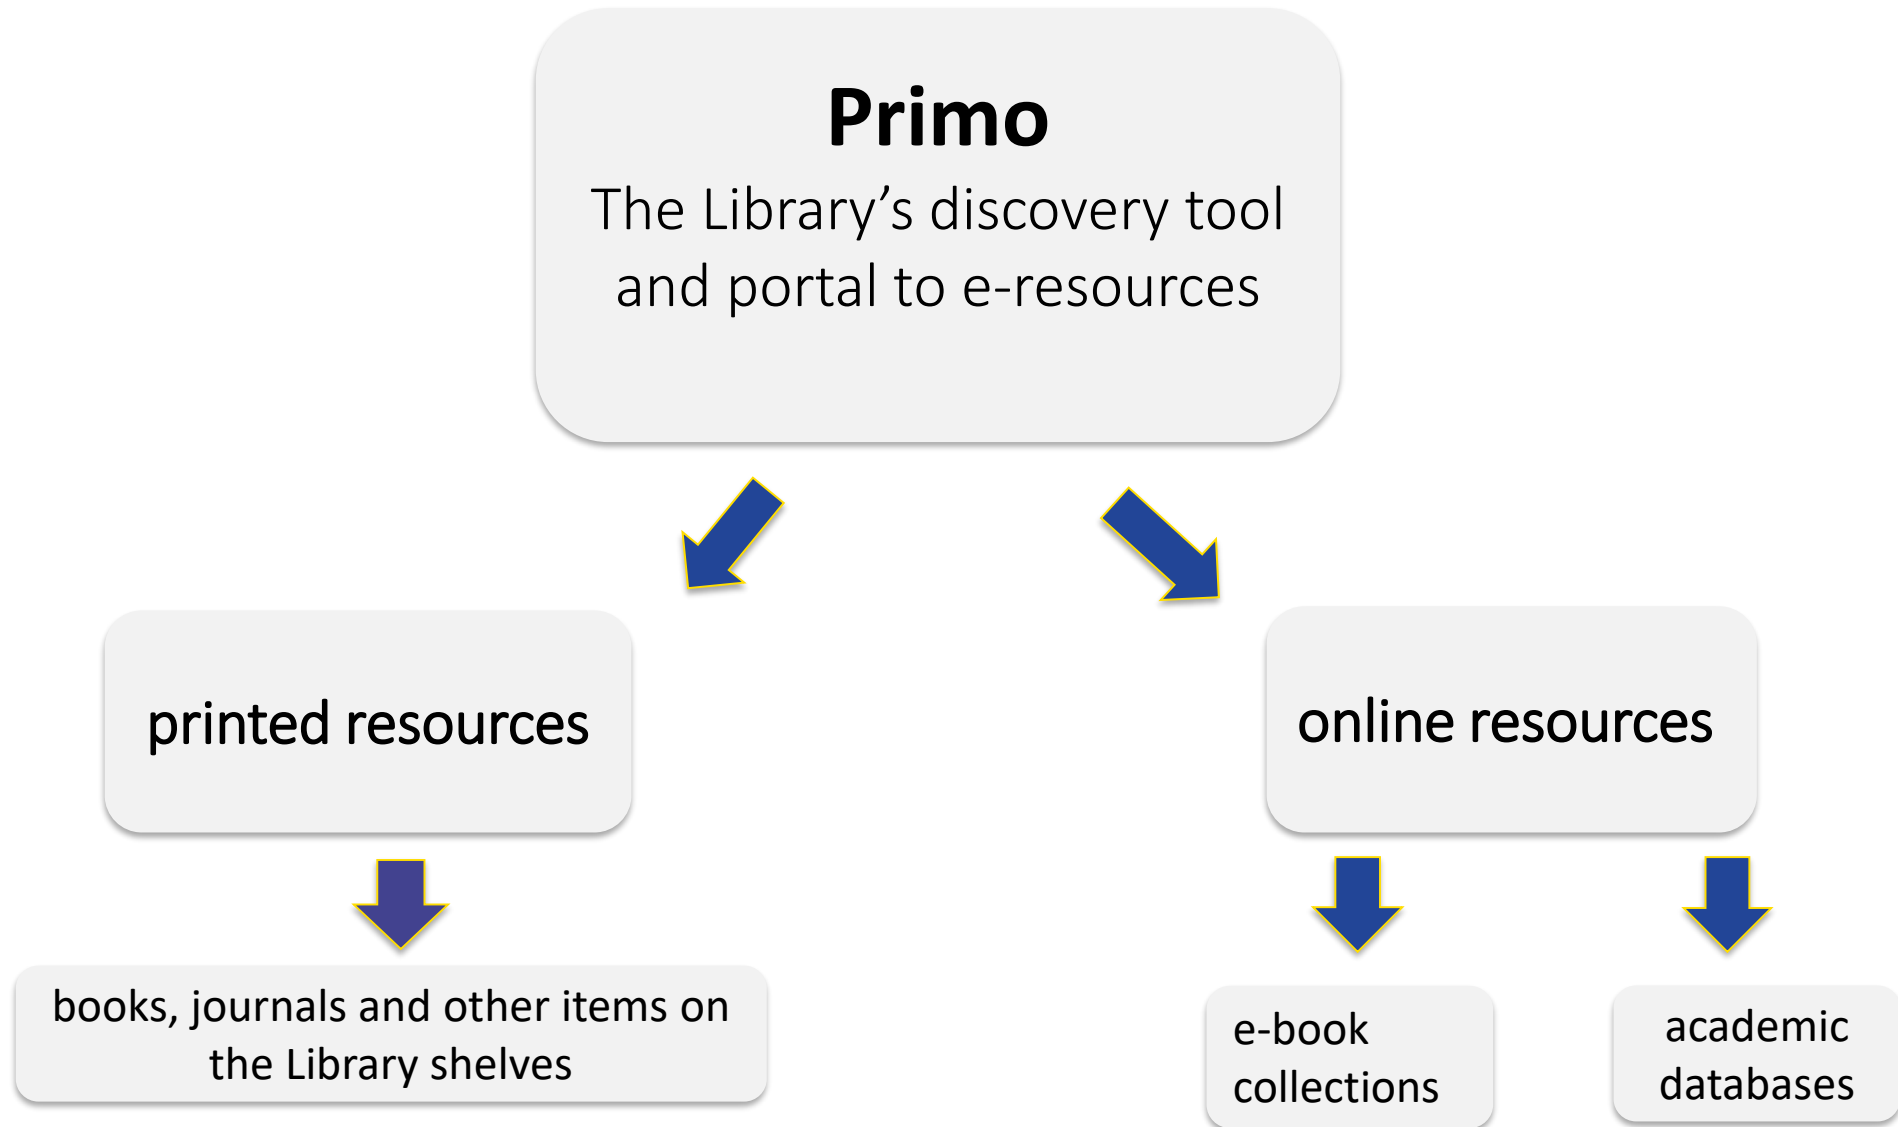

Academic databases, Primo Articles+ tab, Google Scholar: an overview

Academic databases contain scholarly and peer-reviewed articles and other material written by researchers and experts in a field	Primo concentrates on our holdings but has additional features: <ul style="list-style-type: none">• links you to online resources• its Articles+ function searches many of our online collections directly from within the Primo platform	Google Scholar provides a simple way to broadly search for scholarly literature. It is helpful when you are starting the research process on a topic and finds credible journal articles. Often returns results you wouldn't find elsewhere
Scopus and Web of Science are two of our largest multidisciplinary databases. They are user-friendly yet powerful search tools with many options for narrowing and sorting results, and extra features to help you organise your research better	Articles+ is less powerful than searching directly from within a database and doesn't have as many options for narrowing and sorting results	Google Scholar is not maintained by subject specialists; computer errors and repetitions are frequent. Much less sorting and refinement options than in academic databases
We have access to over 200 different academic databases covering all subjects taught at the University of Aberdeen	Articles+ doesn't search all of our online resources	Sometimes Google Scholar misses important articles

In this session you will...

- Look at the importance of planning any searching that you carry out in academic databases
- Find out how to find academic databases in your subject area
- Learn how to access academic databases when off-campus
- Have a chance to use Scopus and ask any questions you may have

The first place to begin any searching

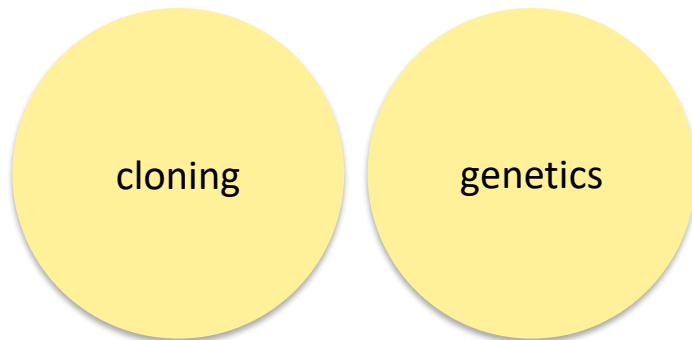

The importance of search rules and planning

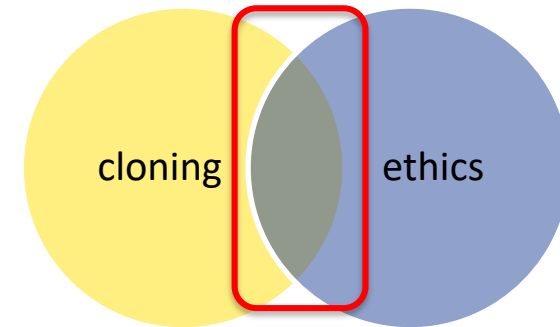

Boolean logic operators

- Academic databases search using Boolean operators
OR & AND are the two main operators used for linking words, phrases and concepts
- Internet search engines such as Google assume operator **AND** between words

OR broadens your search by telling the database that any of the terms you used can be present in the results

AND narrows your search by presenting results where your search terms appear in the same record

- Never type the title of your assignment in as a search
- Apply the search rules to your keywords and phrases

‘Discuss safety issues related to wind farms particularly those located offshore’

“wind farm”		OR	“wind turbine”	
AND				
safety	OR	maintenance	OR	inspect*
AND				
offshore				

Practical exercise: planning a search

- Business, Management and Accounting:
‘Management strategies for small companies’
- Agricultural Chemistry:
‘The use of fungicides in crop protection’
- Languages and Literature:
‘Discuss the difficulties in literary translation’
- Or use a topic of your choice

Find Databases tab in Primo

The image displays two screenshots of the University of Aberdeen Primo interface. The top screenshot shows the main navigation bar with the following tabs: New Search, Journal Search, Find Databases (highlighted with a red box), Browse, ILL Request, and Find It. A red arrow points from the 'Find Databases' tab to the bottom screenshot. The bottom screenshot shows the 'Find Databases' page. The navigation bar now includes 'Database Search' and 'Enter database name' in the search bar. On the left, under 'Databases by category', there is a list of categories: All Ebook Collections, All General Resources, Arts and Humanities, Engineering, Law, Life Sciences, Medicine and Health Sciences, Physical Sciences, and Social Sciences. The 'Arts and Humanities' category is highlighted with a red box. On the right, there is a section titled 'Search for databases' with instructions: 'Use the following options to look for, and link to, databases:' and a bullet point: 'Enter keywords in the search box.'

Click on **Find Databases** at the top of the screen

1. Browse the list of **databases** available in your subject from the options on the left
2. **All Ebook Collections** lists our collections of e-books
3. Find images, theses, reference and other material in **All General Resources**

- 17th and 18th Century Burney Collection (Gale)**
19??
The newspapers and news pamphlets gathered by the Reverend Charles Burney (1757 - 1817) represent the largest single collection of 17th and 18th century English news media. The bound volumes of newspapers and news pamphlets were published mostly in London, however there are also some English provincial, Irish and Scottish papers, and a few examples from the American colonies, Europe and India.
[Available Online >](#)
- 19th Century UK Periodicals (Gale)**
19??
19th Century UK Periodicals is a major new multi-part series which covers the events, lives, values and themes that shaped the 19th century world. Series I on New Readerships provides access to close to 100 periodicals for the study of British life in the 19th century - from women to sports and leisure, and from children to humour. It is mainly based on the repositories of the British Library and the National Library of Scotland.

[> Limit](#)

In the **View Online** section click on the database's name.
Primo will open the database in a new tab

Exercise 1: Identify databases in your subject area

- Sign in to Primo
- Use the **Find Databases** tab to find databases in your subject
- Open the details page for a database and link to it from Primo

Why use Scopus

Large academic database covering science, technology, medicine, social science and the arts & humanities

- Over **50 million records** in Scopus
- Mainly journal articles and conference papers written by academics
- Some materials date back to the 1820s

Easy to use

- Simple search rules
- Links to full text where available
- Can produce simple bibliographies and export directly to RefWorks
- Lots of help available from their own help screens

Sort your results by times cited, relevance, author

Refine what you find by year, author, subject area, document type and other options on the left of the screen

Searching within the results has removed 232 records

Evaluating options in Scopus

The following options for arranging and refining your results are common to Scopus and many other academic databases

You can change the order in which results are listed by:

- **Date Newest or Date Oldest**
- **Cited by**
Brings most frequently cited papers to top of results list - helps identify classic/important papers
Favours older papers over newer ones
Can indicate subject areas not heavily researched
- **Relevance**
This is based on search terms you used and the order in which you entered them
- **Source Title/Authors**
Papers from high impact journals, or respected authors, are well-regarded and listed down the left-hand side of the screen

Exercise 2: Applying your search strategy to Scopus

Topics:

- 'Management strategies for small companies'
- 'The use of fungicides in crop protection'
- 'Discuss the difficulties in literary translation'
- Or topic of your choice

Instruction:

1. Link to Scopus from Primo
2. Use the Documents tab to perform a search using your search strategy
3. Sort and refine your results

Viewing your results in Scopus

<div><div>Hide abstract ▴</div><div></div></div> <div><p>© 2020 Springer Publishing Company. Accounts of Spanish nursing and nurses during the Spanish Civil War (1936–1939) that appear in the memoirs and correspondence of International Brigade volunteers, and are subsequently repeated in the secondary literature on the war, give little indication of existence of trained nurses in country. We set out to examine this apparent erasure of the long tradition of skilled nursing in Spain and the invisibility of thousands of Spanish nurses engaged in the war effort. We ask two questions: How can we understand the narrative thrust of the international volunteer accounts and subsequent historiography? And what was the state of nursing in Spain on the Republican side during the war as presented by Spanish participants and historians? We put the case that the narrative erasure of Spanish professional nursing prior to the Civil War was the result of the politicization of nursing under the Second Republic, its repression and reengineering under the Franco dictatorship, and the subsequent national policy of “oblivion” or forgetting that dominated the country during the transition to democracy. This policy silenced the stories of veteran nurses and prevented an examination of the impact of the Civil War on the Spanish nursing profession.</p></div>

^bDepartment of Humanities: History, Geography and Art & Julio Caro Baroja Institute of Historiography, Carlos III University of Madrid, Spain

Abstract

This paper addresses an early case in critical and anarchist geopolitics by analysing a body of work from Spanish geographer Gonzalo de Reparaz Rodríguez-Báez (1860–1939). After reconstructing the complex and contradictory figure of Reparaz, a scholar and activist who oscillated between very different **political** positions in his especially long and productive career, we focus on the geostrategic writings he produced for the anarchist journals, CNT, Fragua Social and Solidaridad Obrera during the **Spanish Civil War** of 1936–1939. Our argument is twofold. First, in the ideological wanderings of Reparaz, it is possible to identify some elements of coherence around the principles of Iberism, Federalism and Africanism as produced by the Spanish culture of that time. Second, the works he produced for the anarchist press in the last part of his life can provide important insights for present-day scholarship on critical, radical and anarchist geopolitics, especially on what an 'anarchist geopolitics' might look like and which ways it can contribute to the largely debated problem of exiting the 'territorial trap'. The case we present contributes to these debates by showing that an anarchist engagement with 'geopolitics', a term that Reparaz used some times at the end of his career, might draw on challenging clashes of civilization and 'pure' identities, on questioning statist and administrative frameworks of analysis and on focusing more on grassroots activism than on providing

Article information v

Abstract

This article examines the resilient strategies of those people who were politically or ideologically repressed during Francoism. In total, 57 individuals were interviewed in depth in order to establish the strategies that they adopted to overcome adverse situations. The memories of the interviewees not only bring to light the diversity of resources used to face repression, but they also show how their individual strategies of resilience were linked to a collective resilience framework involving a large segment of the population who are still alive or who have handed on their experiences to their descendants. Past memories are consequently connected in the present with the (re)creation of a common identity and the restoration of dignity to the victims, who were classified as criminals in

how to get published

Abstract

This article examines the resilient strategies of those people who were politically or ideologically repressed during Francoism. In total, 57 individuals were interviewed in depth in order to establish the strategies that they adopted to overcome adverse situations. The memories of the interviewees not only bring to light the diversity of resources used to face repression, but they also show how their individual strategies of resilience were linked to a collective resilience framework involving a large segment of the population who are still alive or who have handed on their experiences to their descendants. Past memories are consequently connected in the present with the (re)creation of a common identity and the restoration of dignity to the victims, who were classified as criminals in historical and legal archives and also suffered a process of social stigmatization. However, the aim of this article is not to resurrect the conflict in a society that has been ideologically divided for decades nor to transform history, but by doing this, it should be possible to strengthen the memory to build a future that is free from the ideological

The origins of the Spanish Civil War (1936-1939)

ties, Moscow, Russian F

The Spanish Civil War of 1936—1939 is a tragic page in the history of Spain. The war began in 1936 in Catalonia and spread to the rest of the country. The war was the confrontation between the idea of regional independence in Catalonia of the 19th and 20th centuries, which also in many ways led to the independence of the Basque Country. © Ltd Integration: Education and Science. ☐ 4. **The factors associated with subjective cognitive decline and cognitive function among older adults**

By: Lee, JuHee; Sung, Jooyoun; Choi, MoonKi
JOURNAL OF ADVANCED NURSING Volume: 76 Issue: 2 Pages: 555-565 Published: FEB 2020

Find It **Close Abstract**

Aims To explore the risk factors for subjective cognitive decline and cognitive function among older adults in South Korea. Design This study employed a descriptive cross-sectional design. Methods A convenience sample of 182 patients was recruited from a senior welfare center in Seoul. The mean age of the participants was 78.4 years (SD 5.91). Among them, 64.3% were women. The data were collected by a trained research assistant using structured questionnaires from September 2016-February 2017. Demographic characteristics, comorbidities, depression, physical and cognitive activity levels, instrumental activities of daily living, subjective cognitive decline, and cognitive function were assessed. Student's t tests, chi-square tests, and hierarchical multiple regression analyses were used for statistical analyses. Results The findings revealed that 37.4% of the participants were not cognitively intact. Depression, perceived health status, and cognitive function were significantly associated with subjective cognitive decline ($F = 7.10, p < .001$, adjusted $R^2 = 25.3$). Age, educational level, perceived health status, and subjective cognitive decline were significantly related to cognitive function ($F = 20.98, p < .001$, adjusted $R^2 = 47.0$). After controlling for these variables, cognitive activity was significantly and independently related to cognitive function. Conclusion The results suggest that for the maintenance of cognitive function, cognitive activity should be encouraged. In addition, older adults who complain of subjective cognitive decline and have risk factors such as depression need therapeutic interventions to prevent actual decrease of cognitive function. Impact The present findings advance prior knowledge by considering variables such as physical and cognitive activity levels to provide novel evidence that can be used to develop interventions for community-dwelling older adults. Thus, to be effective, nursing interventions must seek to improve cognitive function through intellectual stimulation.

Abstract feature common in Web of Science and Scopus

Viewing your results in Web of Science

The screenshot displays the Web of Science search results page. On the left, there are three sidebar filters: 'Publication Years' (2020 to 2016), 'Web of Science Categories' (Neurosciences, Clinical Neurology, Psychiatry, Pharmacology, Geriatrics), and 'Document Types' (Article, Review, Proceedings Paper, Book Chapter, Editorial Material). The main area shows a list of search results. The first result, 'The factors associated with subjective cognitive decline and cognitive function among older adults', is highlighted with a red box. Clicking on this title opens a detailed view of the article. The details page shows the article's title, authors (Lee, JuHee; Sung, Jooyoun; Choi, MoonKi), journal (JOURNAL OF ADVANCED NURSING), volume (76), issue (2), pages (555-565), DOI (10.1111/jan.14261), and publication date (FEB 2020). The abstract describes a descriptive cross-sectional design involving 182 patients from a senior welfare center in Seoul. The abstract mentions that cognitive function was significantly associated with subjective cognitive decline (F = 7.10, p < .001, adjusted R-2 = 25.3). The conclusion suggests that cognitive activity should be encouraged for older adults to maintain cognitive function. The keywords include cognitive activity, cognitive function, cognitive performance, depression, elderly, gerontological nursing, nurse, older adults, physical, and questionnaire. On the right side of the details page, there is a 'Citation Network' section showing 0 times cited and a 'Use in Web of Science' section showing 6 citations in the last 180 days and 6 citations since 2013.

If you are struggling to find relevant material:

- Identify one or 2 good papers and...
 1. Move backwards in time – look at the references used to support the paper
 2. Move forwards in time – look at who has cited that paper since it was published
 3. Look at papers related to this one - different options in each database
 4. Use keywords from these to revise your search
- You will never get the perfect search terms at the start of a search. Look at your search history and see what you have tried already
- Check your spelling and typing. Try a different resource; there are many to pick from

Some other academic databases

Access e-resources when off-campus

To access our electronic materials you must prove that you are a student from University of Aberdeen. On-campus you are recognised if you link through Primo

Off-campus you may have to:

- Use Shibboleth/Institution login route if offered
- Allow pop-ups on certain sites
- Install plug-ins
- Change settings on a browser
- Use the **Virtual Desktop Infrastructure**

See Library guide on **Accessing Electronic Information** for details:

www.abdn.ac.uk/library/documents/guides/qgdb005.pdf

Access e-resources when off-campus: using the VDI

Some academic databases require you to use the *Virtual Desktop Infrastructure* when off-campus. To determine this:

1. Go to Primo
2. Select **Find Databases**
3. Browse to the online collection you want to access
4. Click on the name of a database to open its details page. In the **Details** section, check the **Authentication Route**

Authentication Route is **Shibboleth/UK Federation** and IP:

no need to use the VDI

Authentication Route listed as **IP:**

you will need to use the VDI when off campus

Using the VDI

Remote Access

About remote access

The Remote Access services provides staff and students with secure, authenticated access to personal and shared network filespace and to web-based resources from outwith the university network.

VPN

Install the Virtual Private Network (VPN) to your computer and gain access to your H:Drive and to web-based resources off campus or over the University's wireless network.

VDI

Use the Virtual Desktop Infrastructure (VDI) to access electronic resources and powerful applications such as MatLab, Petrel and Wolfram, on a personal device (Windows, Mac, Linux, iOS, Android).

Direct Access (Staff Only)

Direct Access seamlessly connects your University owned and managed Windows laptop to the University network whenever you are off campus and have an internet connection.

Remote Access - VDI

What is VDI?

Use the University's **Virtual Desktop Infrastructure (VDI)** to access electronic resources (e.g. journals and library catalogues) and software including Microsoft Office and Adobe Reader when working off campus on your personal device. Depending on your course enrolments, you may also have access to software specific to your area of study.

Getting started

You can access the VDI in two ways:

- Using the **VMware Horizon Client** on your computer ([page.1](#)) or mobile device ([page.4](#)). You'll need to install the client from the VMWare Horizon website or from the app store for your device.
- Via the **web**, using the internet browser on your computer ([page.6](#)).

You can then remotely connect to a virtual desktop to use available applications and network drives. All you need is an internet connection, and your University username and password.

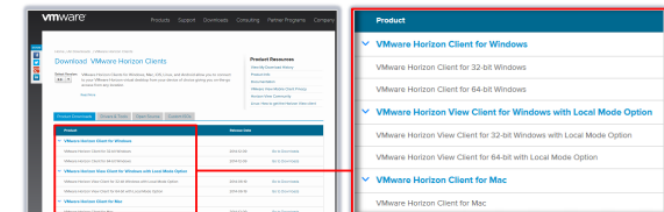

Please note that the number of users who can log into VDI at any one time is limited. If there are no virtual desktops available, you will see the message, "This desktop currently has no desktop sources available. Please try connecting to this desktop again later, or contact your system administrator."

Access VDI via the VMware Horizon Client on your computer

We recommend installing the VMware Horizon Client on a computer that you use frequently.

Download VMware Horizon Client

1. Open your preferred internet browser.
2. In the address bar, enter: <https://www.vmware.com/go/viewclients>
3. Browse the list of available clients for the one suitable for your device, eg Windows 32-bit.

To find out about remote access to the Library, see section:
www.abdn.ac.uk/toolkit/systems/remote-access/ in Toolkit

Help & Support

Please don't hesitate to get in touch if you have any difficulty with using Primo or any of our databases

- **The Sir Duncan Rice Library** – speak to staff on Floors 1 or 3-6, or email subjectteam@abdn.ac.uk
- **Taylor Library** – speak with staff at the Help Desk or email lawlib@abdn.ac.uk
- **Medical Library** – speak with staff at the Help Desk or email medlib@abdn.ac.uk

For subject-related inquiries, contact:

- Ewan Grant e.grant@abdn.ac.uk (Arts & Humanities)
- Janet MacKay j.i.mackay@abdn.ac.uk (Business & Law)
- Mel Bickerton m.bickerton@abdn.ac.uk (Dentistry, Medicine & Medical Sciences)
- Claire Molloy c.a.l.molloy@abdn.ac.uk (Education & Social Science)
- Susan McCourt s.mccourt@abdn.ac.uk (Engineering, Life & Physical Sciences)
- Eleni Borompoka eleni.boro@abdn.ac.uk (General Support)

Further Help & Support

- Our list of **Library guides** can be found at www.abdn.ac.uk/library/support/library-guides-101.php
- Check **MyAberdeen** as some of the reading materials for your course may already be available there
- For any **IT-related queries** contact our colleagues at the IT Service Desk servicedesk@abdn.ac.uk

Responsible access and use

- **Downloaded material**
 - For your personal use, not for sharing
 - If you share, non-compliance with terms/conditions of our license, reduces our usage stats (and may lead to cancellation of subscriptions due to low use)
- **Copyright law applies to print and online materials**
 - Print, copy or scan one chapter of a book
 - Some publishers of electronic books will allow more than this

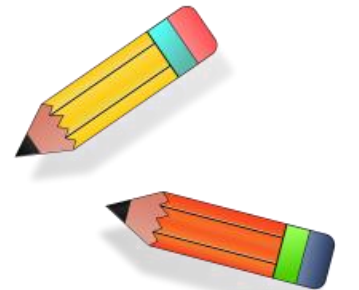

Access to material of a pornographic, criminal or offensive nature including material promoting terrorism is not permitted and the University's web filters will operate to block this. If you need to work with any terrorist-related material that is essential to support your intellectual research or study you must clear this use in advance with your supervisor

Library Regulations available at www.abdn.ac.uk/library/using-libraries/library-regulations-65.php

Any questions?

We would be very grateful if you could take a minute to fill in the evaluation form!

Thank you for attending!
